Fernando Elizondo

Full Stack Developer

fernando.alexis.elizondo@gmail.com | +52 81 8684 1551 | linkedin.com/in/fernando-elizondo | México

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience developing and deploying applications. Specialized in TypeScript, JavaScript, React, Node.js, Express, Material UI, and MySQL for frontend and backend solutions. Experienced with Docker, PM2, and CI/CD automation using Jenkins. Currently expanding cloud and DevOps skills with GCP, Cloud Functions, Terraform, and GitHub Actions, focusing on serverless architectures and deployment automation.

PROFESSIONAL EXPERIENCE

INAP — Full Stack Developer

Mar 2023 – Aug 2026 | Monterrey, Nuevo León

- Led the technical development of a credit application system, coordinating a team of 3 developers and managing requirements directly with stakeholders. Mentored teammates through onboarding and code reviews, coordinating incremental releases through QA and into production.
- Designed and developed responsive interfaces, forms, queries, and administrative modules using React and Material UI, integrated with REST APIs built with Node.js and Express. Implemented authentication, authorization, role-based access control (RBAC), business rules, configurable catalogs, automated notifications, and dynamic document generation.
- Managed environments using Docker and PM2, automating deployments to QA through Jenkins and coordinating incremental releases with the QA team before production.
- Designed data structures for new features, creating tables and relationships with existing data models. Implemented SQL queries and stored procedures to support business processes and improve response times.
- Managed the development lifecycle using Scrum, Jira, and Git, coordinating code integration across developers and resolving version-control conflicts early.

CLOUD & DEVOPS PROJECT

- **Infrastructure as Code:** Provisioned and managed GCP infrastructure using Terraform, including IAM and service configuration.
- **CI/CD & Security:** Automated builds and deployments with GitHub Actions and Cloud Functions; secure authentication with Workload Identity Federation and secret management with Secret Manager.
- **Backend & Testing:** Built REST APIs with Node.js, Express, and TypeScript; implemented JWT authentication, resource ownership-based authorization, input validation, and automated API and integration tests with Vitest and Supertest against PostgreSQL.

TECHNICAL SKILLS

Software Development	TypeScript, JavaScript, Node.js, Express, React, Material UI, PHP, Laravel
Web & APIs	HTML5, CSS3, REST APIs, Postman, JWT, Vitest, Supertest, API and integration testing
Databases & BI	MySQL, HeidiSQL, PostgreSQL, SQL Server, Power BI
DevOps & Tools	Jenkins (CI/CD), Git, GitHub, GitHub Actions, Docker, Terraform, GCP, Cloud Functions, PM2
AI & Local LLMs	Ollama, Qwen, Llama, ChatGPT, Claude, Cursor
Networking	Cisco switch and router configuration, TCP/IP, DNS, DHCP, IP addressing, VLANs, structured cabling, and IP video surveillance (CCTV)

EDUCATION

Universidad Autónoma de Nuevo León (UANL) — FCFM **2017 - 2022**

Bachelor's Degree in Computer Science

CERTIFICATIONS

- Power BI Intermediate: Data Analysis and Modeling
- Scrum Fundamentals Certified (SFC™) — SCRUMstudy
